IREKS malt products – real treasures for bakers...

Aroma and taste of the baked goods – these are fundamental factors for the success of each and every bakery. Malt products from IREKS make the development of a variety of new baked goods with quite special taste profiles possible. At the same time, they contribute towards safeguarding the quality of baked goods during changing situations in regard to raw materials.

Liquid malt products

Malt extract is a saccharified and concentrated malt product.

In addition to the high percentage of various sugars, it contains many components which have an effect on the aroma.

PANIMALTIN

Dark liquid malt extract, gives a typical malty taste and dark colour

Quantity of addition: 1.0 - 4.0 %

MALT EXTRACT

Malt extract for the production of baked goods

Quantity of addition: 1.0 - 3.0 %

Malt products in powder form

Many bakers prefer the use of malts in powder form in comparison to viscous, honey-like malt extract. For this reason, different malt products have been developed where malt extract is combined with malt flour. These non-enzyme active, light special malts are added directly to the dough or used as a value-adding component in many improvers and mixes.

ROGGENA

Malt product to enhance the taste and colour of bread

Quantity of addition: 0.5 - 5.0 %

TRUE MALT X70

Roasted wheat malt flour

Quantity of addition: 0.5 - 2.0 %

Improve the quality of your products:

- ▶ aromatic taste and smell
- ▶ extended freshkeeping
- ▶ improved water binding properties in the dough piece
- ▶ enhanced rising power of the yeast
- ▶ optimum fermentation process
- ▶ intense oven spring

Combine IREKS malt products and IREKS-WHEAT SOUR !

The fascinating combination of sourdough products and malt products enables the development of a variety of new and tasty baked goods, to fulfil the wishes of the consumers for naturalness and tradition in the future as well.
